

**Overall Objectives of the Independent Auditor  
and the Conduct of an Audit in Accordance  
with Singapore Standards on Auditing**

***Conforming Amendments***

**Preface to the Singapore Standards on Quality  
Control, Auditing, Review, Other Assurance  
and Related Services**

**Other SSAs**

This SSA 200 supersedes SSA 200 “Objective and General Principles Governing on Audit of Financial Statements” in September 2009.

Auditors are required to comply with the auditing standards contained in this SSA in respect of audits of financial statements for periods beginning on or after 15 December 2009.

# **SINGAPORE STANDARD ON AUDITING 200 OVERALL OBJECTIVES OF THE INDEPENDENT AUDITOR AND THE CONDUCT OF AN AUDIT IN ACCORDANCE WITH SINGAPORE STANDARDS ON AUDITING**

(Effective for audits of financial statements for periods beginning on or after 15 December 2009)

## **Foreword**

This Standard is based on International Standard on Auditing 200.

## **Introduction**

### **Scope of this SSA**

1. This Singapore Standard on Auditing (SSA) deals with the independent auditor's overall responsibilities when conducting an audit of financial statements in accordance with SSAs. Specifically, it sets out the overall objectives of the independent auditor, and explains the nature and scope of an audit designed to enable the independent auditor to meet those objectives. It also explains the scope, authority and structure of the SSAs, and includes requirements establishing the general responsibilities of the independent auditor applicable in all audits, including the obligation to comply with the SSAs. The independent auditor is referred to as "the auditor" hereafter.
2. SSAs are written in the context of an audit of financial statements by an auditor. They are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. SSAs do not address the responsibilities of the auditor that may exist in legislation, regulation or otherwise in connection with, for example, the offering of securities to the public. Such responsibilities may differ from those established in the SSAs. Accordingly, while the auditor may find aspects of the SSAs helpful in such circumstances, it is the responsibility of the auditor to ensure compliance with all relevant legal, regulatory or professional obligations.

### **An Audit of Financial Statements**

3. The purpose of an audit is to enhance the degree of confidence of intended users in the financial statements. This is achieved by the expression of an opinion by the auditor on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. In the case of most general purpose frameworks, that opinion is on whether the financial statements are presented fairly, in all material respects, or give a true and fair view in accordance with the framework. An audit conducted in accordance with SSAs and relevant ethical requirements enables the auditor to form that opinion. (Ref: Para. A1)
4. The financial statements subject to audit are those of the entity, prepared by management of the entity with oversight from those charged with governance. SSAs do not impose responsibilities on management or those charged with governance and do not override laws and regulations that govern their responsibilities. However, an audit in accordance with SSAs is conducted on the premise that management and, where appropriate, those charged with governance have acknowledged certain responsibilities that are fundamental to the conduct of the audit. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities. (Ref: Para. A2-A11)
5. As the basis for the auditor's opinion, SSAs require the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when

the financial statements are materially misstated) to an acceptably low level. However, reasonable assurance is not an absolute level of assurance, because there are inherent limitations of an audit which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. (Ref: Para. A28-A52)

6. The concept of materiality is applied by the auditor both in planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements, if any, on the financial statements.<sup>1</sup> In general, misstatements, including omissions, are considered to be material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements. Judgments about materiality are made in the light of surrounding circumstances, and are affected by the auditor's perception of the financial information needs of users of the financial statements, and by the size or nature of a misstatement, or a combination of both. The auditor's opinion deals with the financial statements as a whole and therefore the auditor is not responsible for the detection of misstatements that are not material to the financial statements as a whole.
7. The SSAs contain objectives, requirements and application and other explanatory material that are designed to support the auditor in obtaining reasonable assurance. The SSAs require that the auditor exercise professional judgment and maintain professional skepticism throughout the planning and performance of the audit and, among other things:
  - Identify and assess risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal control.
  - Obtain sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.
  - Form an opinion on the financial statements based on conclusions drawn from the audit evidence obtained.
8. The form of opinion expressed by the auditor will depend upon the applicable financial reporting framework and any applicable laws or regulation. (Ref: Para. A12-A13)
9. The auditor may also have certain other communication and reporting responsibilities to users, management, those charged with governance, or parties outside the entity, in relation to matters arising from the audit. These may be established by the SSAs or by applicable laws or regulation.<sup>2</sup>

## **Effective Date**

10. This SSA is effective for audits of financial statements for periods beginning on or after 15 December 2009.

## **Overall Objectives of the Auditor**

11. In conducting an audit of financial statements, the overall objectives of the auditor are:
  - (a) To obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework;

---

<sup>1</sup> SSA 320, "Materiality in Planning and Performing an Audit" and SSA 450, "Evaluation of Misstatements Identified during the Audit."

<sup>2</sup> See, for example, SSA 260, "Communication with Those Charged with Governance;" and paragraph 43 of SSA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements."

and

- (b) To report on the financial statements, and communicate as required by the SSAs, in accordance with the auditor's findings.
12. In all cases when reasonable assurance cannot be obtained and a qualified opinion in the auditor's report is insufficient in the circumstances for purposes of reporting to the intended users of the financial statements, the SSAs require that the auditor disclaim an opinion or withdraw (or resign)<sup>3</sup> from the engagement, where withdrawal is possible under applicable law or regulation.

## Definitions

13. For purposes of the SSAs, the following terms have the meanings attributed below:

- (a) **Applicable financial reporting framework** – The financial reporting framework adopted by management and, where appropriate, those charged with governance in the preparation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

The term "fair presentation framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:

- (i) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- (ii) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term "compliance framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (i) or (ii) above.

- (b) **Audit evidence** – Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. For purposes of the SSAs:
  - (i) Sufficiency of audit evidence is the measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence.
  - (ii) Appropriateness of audit evidence is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based.
- (c) **Audit risk** – The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.
- (d) **Auditor** – The person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. Where an SSA expressly intends that a requirement or responsibility be fulfilled by the

---

<sup>3</sup> In the SSAs, only the term "withdrawal" is used.

engagement partner, the term “engagement partner” rather than “auditor” is used. “Engagement partner” and “firm” are to be read as referring to their public sector equivalents where relevant.

- (e) Detection risk – The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.
- (f) Financial statements – A structured representation of historical financial information, including related notes, intended to communicate an entity’s economic resources or obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information. The term “financial statements” ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement.
- (g) Historical financial information – Information expressed in financial terms in relation to a particular entity, derived primarily from that entity’s accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.
- (h) Management – The person(s) with executive responsibility for the conduct of the entity’s operations. For some entities in some jurisdictions, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager.
- (i) Misstatement – A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be in accordance with the applicable financial reporting framework. Misstatements can arise from error or fraud.

Where the auditor expresses an opinion on whether the financial statements are presented fairly, in all material respects, or give a true and fair view, misstatements also include those adjustments of amounts, classifications, presentation, or disclosures that, in the auditor’s judgment, are necessary for the financial statements to be presented fairly, in all material respects, or to give a true and fair view.

- (j) Premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted – That management and, where appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with SSAs. That is, responsibility:
  - (i) For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant, their fair presentation;
  - (ii) For such internal control as management and, where appropriate, those charged with governance determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
  - (iii) To provide the auditor with:
    - a. Access to all information of which management and, where appropriate, those charged with governance are aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;

- b. Additional information that the auditor may request from management and, where appropriate, those charged with governance for the purpose of the audit; and
- c. Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

In the case of a fair presentation framework, (i) above may be restated as “for the preparation and *fair* presentation of the financial statements in accordance with the financial reporting framework,” or “for the preparation of financial statements *that give a true and fair view* in accordance with the financial reporting framework.”.

The “premise, relating to the responsibilities of management and, where appropriate, those charged with governance, on which an audit is conducted” may also be referred to as the “premise.”

- (k) Professional judgment – The application of relevant training, knowledge and experience, within the context provided by auditing, accounting and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.
- (l) Professional skepticism – An attitude that includes a questioning mind, being alert to conditions which may indicate possible misstatement due to error or fraud, and a critical assessment of audit evidence.
- (m) Reasonable assurance – In the context of an audit of financial statements, a high, but not absolute, level of assurance.
- (n) Risk of material misstatement – The risk that the financial statements are materially misstated prior to audit. This consists of two components, described as follows at the assertion level:
  - (i) Inherent risk – The susceptibility of an assertion about a class of transaction, account balance or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.
  - (ii) Control risk – The risk that a misstatement that could occur in an assertion about a class of transaction, account balance or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity’s internal control.
- (o) Those charged with governance – The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. For some entities in some jurisdictions, those charged with governance may include management personnel, for example, executive members of a governance board of a private or public sector entity, or an owner-manager.

## Requirements

### Ethical Requirements Relating to an Audit of Financial Statements

14. The auditor shall comply with relevant ethical requirements, including those pertaining to independence, relating to financial statement audit engagements. (Ref: Para. A14-A17)

## **Professional Skepticism**

15. The auditor shall plan and perform an audit with professional skepticism recognizing that circumstances may exist that cause the financial statements to be materially misstated. (Ref: Para. A18-A22)

## **Professional Judgment**

16. The auditor shall exercise professional judgment in planning and performing an audit of financial statements. (Ref: Para. A23-A27)

## **Sufficient Appropriate Audit Evidence and Audit Risk**

17. To obtain reasonable assurance, the auditor shall obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion. (Ref: Para. A28-A52)

## **Conduct of an Audit in Accordance with SSAs**

### *Complying with SSAs Relevant to the Audit*

18. The auditor shall comply with all SSAs relevant to the audit. An SSA is relevant to the audit when the SSA is in effect and the circumstances addressed by the SSA exist. (Ref: Para. A53-A57)
19. The auditor shall have an understanding of the entire text of an SSA, including its application and other explanatory material, to understand its objectives and to apply its requirements properly. (Ref: Para. A58-A66)
20. The auditor shall not represent compliance with SSAs in the auditor's report unless the auditor has complied with the requirements of this SSA and all other SSAs relevant to the audit.

### *Objectives Stated in Individual SSAs*

21. To achieve the overall objectives of the auditor, the auditor shall use the objectives stated in relevant SSAs in planning and performing the audit, having regard to the interrelationships among the SSAs, to: (Ref: Para. A67-A69)
  - (a) Determine whether any audit procedures in addition to those required by the SSAs are necessary in pursuance of the objectives stated in the SSAs; and (Ref: Para. A70)
  - (b) Evaluate whether sufficient appropriate audit evidence has been obtained. (Ref: Para. A71)

### *Complying with Relevant Requirements*

22. Subject to paragraph 23, the auditor shall comply with each requirement of an SSA unless, in the circumstances of the audit:
  - (a) The entire SSA is not relevant; or
  - (b) The requirement is not relevant because it is conditional and the condition does not exist. (Ref: Para. A72-A73)
23. In exceptional circumstances, the auditor may judge it necessary to depart from a relevant requirement in an SSA. In such circumstances, the auditor shall perform alternative audit

procedures to achieve the aim of that requirement. The need for the auditor to depart from a relevant requirement is expected to arise only where the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective in achieving the aim of the requirement. (Ref: Para. A74)

#### *Failure to Achieve an Objective*

24. If an objective in a relevant SSA cannot be achieved, the auditor shall evaluate whether this prevents the auditor from achieving the overall objectives of the auditor and thereby requires the auditor, in accordance with the SSAs, to modify the auditor's opinion or withdraw from the engagement (where withdrawal is possible under applicable law or regulation). Failure to achieve an objective represents a significant matter requiring documentation in accordance with SSA 230.<sup>4</sup> (Ref: Para. A75-A76)

\*\*\*

---

<sup>4</sup> SSA 230, "Audit Documentation," paragraph 8(c).

# Application and Other Explanatory Material

## An Audit of Financial Statements

### *Scope of the Audit (Ref: Para. 3)*

- A1. The auditor's opinion on the financial statements deals with whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework. Such an opinion is common to all audits of financial statements. The auditor's opinion therefore does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity. In some jurisdictions, however, applicable laws or regulations may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control, or the consistency of a separate management report with the financial statements. While the SSAs include requirements and guidance in relation to such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.

### *Preparation of the Financial Statements (Ref: Para. 4)*

- A2. Law or regulation may establish the responsibilities of management and, where appropriate, those charged with governance in relation to financial reporting. However, the extent of these responsibilities, or the way in which they are described, may differ across jurisdictions. Despite these differences, an audit in accordance with SSAs is conducted on the premise that management and, where appropriate, those charged with governance have acknowledged and understand that they have responsibility:
- (a) For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant, their fair presentation;
  - (b) For such internal control as management and, where appropriate, those charged with governance determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
  - (c) To provide the auditor with:
    - (i) Access to all information of which management and, where appropriate, those charged with governance are aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
    - (ii) Additional information that the auditor may request from management and, where appropriate, those charged with governance for the purpose of the audit; and
    - (iii) Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.
- A3. The preparation of the financial statements by management and, where appropriate, those charged with governance requires:
- The identification of the applicable financial reporting framework, in the context of any relevant laws or regulations.
  - The preparation of the financial statements in accordance with that framework.
  - The inclusion of an adequate description of that framework in the financial statements.

The preparation of the financial statements requires management to exercise judgment in making accounting estimates that are reasonable in the circumstances, as well as to select and apply appropriate accounting policies. These judgments are made in the context of the applicable financial reporting framework.

- A4. The financial statements may be prepared in accordance with a financial reporting framework designed to meet:
- The common financial information needs of a wide range of users (that is, “general purpose financial statements”); or
  - The financial information needs of specific users (that is, “special purpose financial statements”).
- A5. The applicable financial reporting framework often encompasses financial reporting standards established by an authorized or recognized standards setting organization, or legislative or regulatory requirements. In some cases, the financial reporting framework may encompass both financial reporting standards established by an authorized or recognized standards setting organization and legislative or regulatory requirements. Other sources may provide direction on the application of the applicable financial reporting framework. In some cases, the applicable financial reporting framework may encompass such other sources, or may even consist only of such sources. Such other sources may include:
- The legal and ethical environment, including statutes, regulations, court decisions, and professional ethical obligations in relation to accounting matters;
  - Published accounting interpretations of varying authority issued by standards setting, professional or regulatory organizations;
  - Published views of varying authority on emerging accounting issues issued by standards setting, professional or regulatory organizations;
  - General and industry practices widely recognized and prevalent; and
  - Accounting literature.

Where conflicts exist between the financial reporting framework and the sources from which direction on its application may be obtained, or among the sources that encompass the financial reporting framework, the source with the highest authority prevails.

- A6. The requirements of the applicable financial reporting framework determine the form and content of the financial statements. Although the framework may not specify how to account for or disclose all transactions or events, it ordinarily embodies sufficient broad principles that can serve as a basis for developing and applying accounting policies that are consistent with the concepts underlying the requirements of the framework.
- A7. Some financial reporting frameworks are fair presentation frameworks, while others are compliance frameworks. Financial reporting frameworks that encompass primarily the financial reporting standards established by an organization that is authorized or recognized to promulgate standards to be used by entities for preparing general purpose financial statements are often designed to achieve fair presentation, for example, Financial Reporting Standards (FRSs) issued by the Accounting Standards Council (ASC).
- A8. The requirements of the applicable financial reporting framework also determine what constitutes a complete set of financial statements. In the case of many frameworks, financial statements are intended to provide information about the financial position, financial performance and cash flows of an entity. For such frameworks, a complete set of financial statements would include a balance sheet; an income statement; a statement of changes in equity; a cash flow statement; and related notes. For some other financial reporting frameworks, a single financial statement and the related notes might constitute a complete set

of financial statements:

- For example, the International Public Sector Accounting Standard (IPSAS), “Financial Reporting Under the Cash Basis of Accounting” issued by the International Public Sector Accounting Standards Board states that the primary financial statement is a statement of cash receipts and payments when a public sector entity prepares its financial statements in accordance with that IPSAS.
- Other examples of a single financial statement, each of which would include related notes, are:
  - o Balance sheet.
  - o Statement of income or statement of operations.
  - o Statement of retained earnings.
  - o Statement of cash flows.
  - o Statement of assets and liabilities that does not include owner’s equity.
  - o Statement of changes in owners’ equity.
  - o Statement of revenue and expenses.
  - o Statement of operations by product lines.

A9. SSA 210 establishes requirements and provides guidance on determining the acceptability of the applicable financial reporting framework.<sup>5</sup> SSA 800 deals with special considerations when financial statements are prepared in accordance with a special purpose framework.<sup>6</sup>

A10. Because of the significance of the premise to the conduct of an audit, the auditor is required to obtain the agreement of management and, where appropriate, those charged with governance that they acknowledge and understand that they have the responsibilities set out in paragraph A2 as a precondition for accepting the audit engagement.<sup>7</sup>

### Considerations Specific to Audits in the Public Sector

A11. The mandates for audits of the financial statements of public sector entities may be broader than those of other entities. As a result, the premise, relating to management’s responsibilities, on which an audit of the financial statements of a public sector entity is conducted may include additional responsibilities, such as the responsibility for the execution of transactions and events in accordance with law, regulation or other authority.<sup>8</sup>

### *Form of the Auditor’s Opinion (Ref: Para. 8)*

A12. The opinion expressed by the auditor is on whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework. The form of the auditor’s opinion, however, will depend upon the applicable financial reporting framework and any applicable law or regulation. Most financial reporting frameworks include requirements relating to the presentation of the financial statements; for such frameworks, *preparation* of the financial statements in accordance with the applicable financial reporting framework includes *presentation*.

A13. Where the financial reporting framework is a fair presentation framework, as is generally the

---

<sup>5</sup> SSA 210, “Agreeing the Terms of Audit Engagements,” paragraph 6(a)

<sup>6</sup> SSA 800, “Special Considerations—Audits of Financial Statements Prepared in Accordance with Special Purpose Frameworks,” paragraph 8.

<sup>7</sup> SSA 210, paragraph 6(b).

<sup>8</sup> See paragraph A57.

case for general purpose financial statements, the opinion required by the SSAs is on whether the financial statements are presented fairly, in all material respects, or give a true and fair view. Where the financial reporting framework is a compliance framework, the opinion required is on whether the financial statements are prepared, in all material respects, in accordance with the framework. Unless specifically stated otherwise, references in the SSAs to the auditor's opinion cover both forms of opinion.

## **Ethical Requirements Relating to an Audit of Financial Statements (Ref: Para. 14)**

- A14. The auditor is subject to relevant ethical requirements, including those pertaining to independence, relating to financial statement audit engagements. Relevant ethical requirements ordinarily comprise Parts A and B of the ISCA and ACRA Codes (the Codes) related to an audit of financial statements together with national requirements that are more restrictive.
- A15. Part A of the ISCA and ACRA Codes (the Codes) establish the fundamental principles of professional ethics relevant to the auditor when conducting an audit of financial statements and provides a conceptual framework for applying those principles. The fundamental principles with which the auditor is required to comply by the Codes are:
- (a) Integrity;
  - (b) Objectivity;
  - (c) Professional competence and due care;
  - (d) Confidentiality; and
  - (e) Professional behavior.

Part B of the Codes illustrate how the conceptual framework is to be applied in specific situations.

- A16. In the case of an audit engagement it is in the public interest and, therefore, required by the Codes, that the auditor be independent of the entity subject to the audit. The Codes describe independence as comprising both independence of mind and independence in appearance. The auditor's independence from the entity safeguards the auditor's ability to form an audit opinion without being affected by influences that might compromise that opinion. Independence enhances the auditor's ability to act with integrity, to be objective and to maintain an attitude of professional skepticism.
- A17. Singapore Standard on Quality Control (SSQC) 1,<sup>9</sup> or national requirements that are at least as demanding,<sup>10</sup> deal with the firm's responsibilities to establish and maintain its system of quality control for audit engagements. SSQC 1 sets out the responsibilities of the firm for establishing policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements, including those pertaining to independence.<sup>11</sup> SSA 220 sets out the engagement partner's responsibilities with respect to relevant ethical requirements. These include remaining alert, through observation and making inquiries as necessary, for evidence of non-compliance with relevant ethical requirements by members of the engagement team, determining the appropriate action if matters come to the engagement partner's attention that indicate that members of the engagement team have not complied with relevant ethical requirements, and forming a conclusion on compliance with independence requirements that apply to the audit engagement.<sup>12</sup> SSA 220 recognizes that the engagement team is entitled to rely on a firm's

---

<sup>9</sup> SSQC 1, "Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements."

<sup>10</sup> SSA 220, "Quality Control for an Audit of Financial Statements," paragraph 2.

<sup>11</sup> SSQC 1, paragraphs 20-25.

<sup>12</sup> SSA 220, paragraphs 9-12.

system of quality control in meeting its responsibilities with respect to quality control procedures applicable to the individual audit engagement, unless information provided by the firm or other parties suggests otherwise.

## **Professional Skepticism (Ref: Para. 15)**

A18. Professional skepticism includes being alert to, for example:

- Audit evidence that contradicts other audit evidence obtained.
- Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.
- Conditions that may indicate possible fraud.
- Circumstances that suggest the need for audit procedures in addition to those required by the SSAs.

A19. Maintaining professional skepticism throughout the audit is necessary if the auditor is, for example, to reduce the risks of:

- Overlooking unusual circumstances.
- Over generalizing when drawing conclusions from audit observations.
- Using inappropriate assumptions in determining the nature, timing, and extent of the audit procedures and evaluating the results thereof.

A20. Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management and those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in the light of the circumstances, for example in the case where fraud risk factors exist and a single document, of a nature that is susceptible to fraud, is the sole supporting evidence for a material financial statement amount.

A21. The auditor may accept records and documents as genuine unless the auditor has reason to believe the contrary. Nevertheless, the auditor is required to consider the reliability of information to be used as audit evidence.<sup>13</sup> In cases of doubt about the reliability of information or indications of possible fraud (for example, if conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document may have been falsified), the SSAs require that the auditor investigate further and determine what modifications or additions to audit procedures are necessary to resolve the matter.<sup>14</sup>

A22. The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less-than-persuasive audit evidence when obtaining reasonable assurance.

## **Professional Judgment (Ref: Para. 16)**

A23. Professional judgment is essential to the proper conduct of an audit. This is because interpretation of relevant ethical requirements and the SSAs and the informed decisions required throughout the audit cannot be made without the application of relevant knowledge and experience to the facts and circumstances. Professional judgment is necessary in

---

<sup>13</sup> SSA 500, "Audit Evidence," paragraphs 7-9.

<sup>14</sup> SSA 240, paragraph 13; SSA 500, paragraph 11; SSA 505, "External Confirmations," paragraphs 10-11, and 16.

particular regarding decisions about:

- Materiality and audit risk.
- The nature, timing, and extent of audit procedures used to meet the requirements of the SSAs and gather audit evidence.
- Evaluating whether sufficient appropriate audit evidence has been obtained, and whether more needs to be done to achieve the objectives of the SSAs and thereby, the overall objectives of the auditor.
- The evaluation of management's judgments in applying the entity's applicable financial reporting framework.
- The drawing of conclusions based on the audit evidence obtained, for example, assessing the reasonableness of the estimates made by management in preparing the financial statements.

- A24. The distinguishing feature of the professional judgment expected of an auditor is that it is exercised by an auditor whose training, knowledge and experience have assisted in developing the necessary competencies to achieve reasonable judgments.
- A25. The exercise of professional judgment in any particular case is based on the facts and circumstances that are known by the auditor. Consultation on difficult or contentious matters during the course of the audit, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm, such as that required by SSA 220,<sup>15</sup> assist the auditor in making informed and reasonable judgments.
- A26. Professional judgment can be evaluated based on whether the judgment reached reflects a competent application of auditing and accounting principles and is appropriate in the light of, and consistent with, the facts and circumstances that were known to the auditor up to the date of the auditor's report.
- A27. Professional judgment needs to be exercised throughout the audit. It also needs to be appropriately documented. In this regard, the auditor is required to prepare audit documentation sufficient to enable an experienced auditor, having no previous connection with the audit, to understand the significant professional judgments made in reaching conclusions on significant matters arising during the audit.<sup>16</sup> Professional judgment is not to be used as the justification for decisions that are not otherwise supported by the facts and circumstances of the engagement or sufficient appropriate audit evidence.

## **Sufficient Appropriate Audit Evidence and Audit Risk (Ref: Para. 5 and 17)**

### *Sufficiency and Appropriateness of Audit Evidence*

- A28. Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit<sup>17</sup>) or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared by an expert employed or engaged by the entity. Audit evidence comprises both information that supports and corroborates management's assertions, and any information that contradicts such

---

<sup>15</sup> SSA 220, paragraph 18.

<sup>16</sup> SSA 230, paragraph 8.

<sup>17</sup> SSA 315, "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment," paragraph 9.

assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and therefore, also constitutes audit evidence. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence.

- A29. The sufficiency and appropriateness of audit evidence are interrelated. Sufficiency is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate for its poor quality.
- A30. Appropriateness is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained.
- A31. Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. SSA 500 and other relevant SSAs establish additional requirements and provide further guidance applicable throughout the audit regarding the auditor's considerations in obtaining sufficient appropriate audit evidence.

### *Audit Risk*

- A32. Audit risk is a function of the risks of material misstatement and detection risk. The assessment of risks is based on audit procedures to obtain information necessary for that purpose and evidence obtained throughout the audit. The assessment of risks is a matter of professional judgment, rather than a matter capable of precise measurement.
- A33. For purposes of the SSAs, audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, audit risk is a technical term related to the process of auditing; it does not refer to the auditor's business risks such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements.

### *Risks of Material Misstatement*

- A34. The risks of material misstatement may exist at two levels:
- The overall financial statement level; and
  - The assertion level for classes of transactions, account balances, and disclosures.
- A35. Risks of material misstatement at the overall financial statement level refer to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions.
- A36. Risks of material misstatement at the assertion level are assessed in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk. Auditors use various approaches to accomplish the objective of assessing the risks of material misstatement. For example, the auditor may make use of a model that expresses the general relationship of the components of audit risk in mathematical terms to arrive at an acceptable level of detection risk. Some auditors find such a model to be useful when planning audit procedures.
- A37. The risks of material misstatement at the assertion level consist of two components: inherent risk and control risk. Inherent risk and control risk are the entity's risks; they exist

independently of the audit of the financial statements.

- A38. Inherent risk is higher for some assertions and related classes of transactions, account balances, and disclosures than for others. For example, it may be higher for complex calculations or for accounts consisting of amounts derived from accounting estimates that are subject to significant estimation uncertainty. External circumstances giving rise to business risks may also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. Factors in the entity and its environment that relate to several or all of the classes of transactions, account balances, or disclosures may also influence the inherent risk related to a specific assertion. Such factors may include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.
- A39. Control risk is a function of the effectiveness of the design, implementation and maintenance of internal control by management to address identified risks that threaten the achievement of the entity's objectives relevant to preparation of the entity's financial statements. However, internal control, no matter how well designed and operated, can only reduce, but not eliminate, risks of material misstatement in the financial statements, because of the inherent limitations of internal control. These include, for example, the possibility of human errors or mistakes, or of controls being circumvented by collusion or inappropriate management override. Accordingly, some control risk will always exist. The SSAs provide the conditions under which the auditor is required to, or may choose to, test the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures to be performed.<sup>18</sup>
- A40. The SSAs do not ordinarily refer to inherent risk and control risk separately, but rather to a combined assessment of the "risks of material misstatement." However, the auditor may make separate or combined assessments of inherent and control risk depending on preferred audit techniques or methodologies and practical considerations. The assessment of the risks of material misstatement may be expressed in quantitative terms, such as in percentages, or in non-quantitative terms. In any case, the need for the auditor to make appropriate risk assessments is more important than the different approaches by which they may be made.
- A41. SSA 315 establishes requirements and provides guidance on identifying and assessing the risks of material misstatement at the financial statement and assertion levels.

### Detection Risk

- A42. For a given level of audit risk, the acceptable level of detection risk bears an inverse relationship to the assessed risks of material misstatement at the assertion level. For example, the greater the risks of material misstatement the auditor believes exists, the less the detection risk that can be accepted and, accordingly, the more persuasive the audit evidence required by the auditor.
- A43. Detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to an acceptably low level. It is therefore a function of the effectiveness of an audit procedure and of its application by the auditor. Matters such as:
- adequate planning;
  - proper assignment of personnel to the engagement team;
  - the application of professional skepticism; and
  - supervision and review of the audit work performed,

---

<sup>18</sup> SSA 330, "The Auditor's Responses to Assessed Risks," paragraphs 7-17.

assist to enhance the effectiveness of an audit procedure and of its application and reduce the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results.

- A44. SSA 300<sup>19</sup> and SSA 330 establish requirements and provide guidance on planning an audit of financial statements and the auditor's responses to assessed risks. Detection risk, however, can only be reduced, not eliminated, because of the inherent limitations of an audit. Accordingly, some detection risk will always exist.

### *Inherent Limitations of an Audit*

- A45. The auditor is not expected to, and cannot, reduce audit risk to zero and cannot therefore obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because there are inherent limitations of an audit, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. The inherent limitations of an audit arise from:

- The nature of financial reporting;
- The nature of audit procedures; and
- The need for the audit to be conducted within a reasonable period of time and at a reasonable cost.

### *The Nature of Financial Reporting*

- A46. The preparation of financial statements involves judgment by management in applying the requirements of the entity's applicable financial reporting framework to the facts and circumstances of the entity. In addition, many financial statement items involve subjective decisions or assessments or a degree of uncertainty, and there may be a range of acceptable interpretations or judgments that may be made. Consequently, some financial statement items are subject to an inherent level of variability which cannot be eliminated by the application of additional auditing procedures. For example, this is often the case with respect to certain accounting estimates. Nevertheless, the SSAs require the auditor to give specific consideration to whether accounting estimates are reasonable in the context of the applicable financial reporting framework and related disclosures, and to the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.<sup>20</sup>

### *The Nature of Audit Procedures*

- A47. There are practical and legal limitations on the auditor's ability to obtain audit evidence. For example:
- There is the possibility that management or others may not provide, intentionally or unintentionally, the complete information that is relevant to the preparation of the financial statements or that has been requested by the auditor. Accordingly, the auditor cannot be certain of the completeness of information, even though the auditor has performed audit procedures to obtain assurance that all relevant information has been obtained.
  - Fraud may involve sophisticated and carefully organized schemes designed to conceal it. Therefore, audit procedures used to gather audit evidence may be ineffective for detecting an intentional misstatement that involves, for example, collusion to falsify documentation which may cause the auditor to believe that audit

---

<sup>19</sup> SSA 300, "Planning an Audit of Financial Statements."

<sup>20</sup> SSA 540, "Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures," and SSA 700, "Forming an Opinion and Reporting on Financial Statements," paragraph 12.

evidence is valid when it is not. The auditor is neither trained as nor expected to be an expert in the authentication of documents.

- An audit is not an official investigation into alleged wrongdoing. Accordingly, the auditor is not given specific legal powers, such as the power of search, which may be necessary for such an investigation.

#### Timeliness of Financial Reporting and the Balance between Benefit and Cost

A48. The matter of difficulty, time, or cost involved is not in itself a valid basis for the auditor to omit an audit procedure for which there is no alternative or to be satisfied with audit evidence that is less than persuasive. Appropriate planning assists in making sufficient time and resources available for the conduct of the audit. Notwithstanding this, the relevance of information, and thereby its value, tends to diminish over time, and there is a balance to be struck between the reliability of information and its cost. This is recognized in certain financial reporting frameworks (see, for example, the ASC's "Framework for the Preparation and Presentation of Financial Statements"). Therefore, there is an expectation by users of financial statements that the auditor will form an opinion on the financial statements within a reasonable period of time and at a reasonable cost, recognizing that it is impracticable to address all information that may exist or to pursue every matter exhaustively on the assumption that information is in error or fraudulent until proved otherwise.

A49. Consequently, it is necessary for the auditor to:

- Plan the audit so that it will be performed in an effective manner;
- Direct audit effort to areas most expected to contain risks of material misstatement, whether due to fraud or error, with correspondingly less effort directed at other areas; and
- Use testing and other means of examining populations for misstatements.

A50. In light of the approaches described in paragraph A49, the SSAs contain requirements for the planning and performance of the audit and require the auditor, among other things, to:

- Have a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels by performing risk assessment procedures and related activities;<sup>21</sup> and
- Use testing and other means of examining populations in a manner that provides a reasonable basis for the auditor to draw conclusions about the population.<sup>22</sup>

#### Other Matters that Affect the Inherent Limitations of an Audit

A51. In the case of certain assertions or subject matters, the potential effects of the inherent limitations on the auditor's ability to detect material misstatements are particularly significant. Such assertions or subject matters include:

- Fraud, particularly fraud involving senior management or collusion. See SSA 240 for further discussion.
- The existence and completeness of related party relationships and transactions. See SSA 550<sup>23</sup> for further discussion.
- The occurrence of non-compliance with laws and regulations. See SSA 250<sup>24</sup> for further discussion.

---

<sup>21</sup> SSA 315, paragraphs 5-10.

<sup>22</sup> SSA 330; SSA 500; SSA 520, "Analytical Procedures;" SSA 530, "Audit Sampling."

<sup>23</sup> SSA 550, "Related Parties."

<sup>24</sup> SSA 250, "Consideration of Laws and Regulations in an Audit of Financial Statements."

- Future events or conditions that may cause an entity to cease to continue as a going concern. See SSA 570<sup>25</sup> for further discussion.

Relevant SSAs identify specific audit procedures to assist in mitigating the effect of the inherent limitations.

- A52. Because of the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with SSAs. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with SSAs. However, the inherent limitations of an audit are not a justification for the auditor to be satisfied with less-than-persuasive audit evidence. Whether the auditor has performed an audit in accordance with SSAs is determined by the audit procedures performed in the circumstances, the sufficiency and appropriateness of the audit evidence obtained as a result thereof and the suitability of the auditor's report based on an evaluation of that evidence in light of the overall objectives of the auditor.

## **Conduct of an Audit in Accordance with SSAs**

### *Nature of the SSAs (Ref: Para. 18)*

- A53. The SSAs, taken together, provide the standards for the auditor's work in fulfilling the overall objectives of the auditor. The SSAs deal with the general responsibilities of the auditor, as well as the auditor's further considerations relevant to the application of those responsibilities to specific topics.
- A54. The scope, effective date and any specific limitation of the applicability of a specific SSA is made clear in the SSA. Unless otherwise stated in the SSA, the auditor is permitted to apply an SSA before the effective date specified therein.
- A55. In performing an audit, the auditor may be required to comply with legal or regulatory requirements in addition to the SSAs. The SSAs do not override law or regulation that governs an audit of financial statements. In the event that such law or regulations differs from the SSAs, an audit conducted only in accordance with law or regulations will not automatically comply with SSAs.
- A56. The auditor may also conduct the audit in accordance with both SSAs and auditing standards of a specific jurisdiction or country. In such cases, in addition to complying with each of the SSAs relevant to the audit, it may be necessary for the auditor to perform additional audit procedures in order to comply with the relevant standards of that jurisdiction or country.

### **Considerations Specific to Audits in the Public Sector**

- A57. The SSAs are relevant to engagements in the public sector. The public sector auditor's responsibilities, however, may be affected by the audit mandate, or by obligations on public sector entities arising from law, regulation or other authority (such as ministerial directives, government policy requirements, or resolutions of the legislature), which may encompass a broader scope than an audit of financial statements in accordance with the SSAs. These additional responsibilities are not dealt with in the SSAs. They may be dealt with in the pronouncements of the International Organization of Supreme Audit Institutions or national standard setters, or in guidance developed by government audit agencies.

### *Contents of the SSAs (Ref: Para. 19)*

- A58. In addition to objectives and requirements (requirements are expressed in the SSAs using

---

<sup>25</sup> SSA 570, "Going Concern."

“shall”), an SSA contains related guidance in the form of application and other explanatory material. It may also contain introductory material that provides context relevant to a proper understanding of the SSA, and definitions. The entire text of an SSA, therefore, is relevant to an understanding of the objectives stated in an SSA and the proper application of the requirements of an SSA.

A59. Where necessary, the application and other explanatory material provides further explanation of the requirements of an SSA and guidance for carrying them out. In particular, it may:

- Explain more precisely what a requirement means or is intended to cover.
- Include examples of procedures that may be appropriate in the circumstances.

While such guidance does not in itself impose a requirement, it is relevant to the proper application of the requirements of an SSA. The application and other explanatory material may also provide background information on matters addressed in an SSA.

A60. Appendices form part of the application and other explanatory material. The purpose and intended use of an appendix are explained in the body of the related SSA or within the title and introduction of the appendix itself.

A61. Introductory material may include, as needed, such matters as explanation of:

- The purpose and scope of the SSA, including how the SSA relates to other SSAs.
- The subject matter of the SSA.
- The respective responsibilities of the auditor and others in relation to the subject matter of the SSA.
- The context in which the SSA is set.

A62. An SSA may include, in a separate section under the heading “Definitions,” a description of the meanings attributed to certain terms for purposes of the SSAs. These are provided to assist in the consistent application and interpretation of the SSAs, and are not intended to override definitions that may be established for other purposes, whether in law, regulation or otherwise. Unless otherwise indicated, those terms will carry the same meanings throughout the SSAs. The Glossary of Terms contains a complete listing of terms defined in the SSAs. It also includes descriptions of other terms found in SSAs to assist in common and consistent interpretation and translation.

A63. When appropriate, additional considerations specific to audits of smaller entities and public sector entities are included within the application and other explanatory material of an SSA. These additional considerations assist in the application of the requirements of the SSA in the audit of such entities. They do not, however, limit or reduce the responsibility of the auditor to apply and comply with the requirements of the SSAs.

### Considerations Specific to Smaller Entities

A64. For purposes of specifying additional considerations to audits of smaller entities, a “smaller entity” refers to an entity which typically possesses qualitative characteristics such as:

- (a) Concentration of ownership and management in a small number of individuals (often a single individual – either a natural person or another enterprise that owns the entity provided the owner exhibits the relevant qualitative characteristics); and
- (b) One or more of the following:
  - (i) Straightforward or uncomplicated transactions;

- (ii) Simple record-keeping;
- (iii) Few lines of business and few products within business lines;
- (iv) Few internal controls;
- (v) Few levels of management with responsibility for a broad range of controls;  
or
- (vi) Few personnel, many having a wide range of duties.

These qualitative characteristics are not exhaustive, they are not exclusive to smaller entities, and smaller entities do not necessarily display all of these characteristics.

- A65. The considerations specific to smaller entities included in the SSAs have been developed primarily with unlisted entities in mind. Some of the considerations, however, may be helpful in audits of smaller listed entities.
- A66. The SSAs refer to the proprietor of a smaller entity who is involved in running the entity on a day-to-day basis as the “owner-manager.”

#### *Objectives Stated in Individual SSAs (Ref: Para. 21)*

- A67. Each SSA contains one or more objectives which provide a link between the requirements and the overall objectives of the auditor. The objectives in individual SSAs serve to focus the auditor on the desired outcome of the SSA, while being specific enough to assist the auditor in:
- Understanding what needs to be accomplished and, where necessary, the appropriate means of doing so; and
  - Deciding whether more needs to be done to achieve them in the particular circumstances of the audit.
- A68. Objectives are to be understood in the context of the overall objectives of the auditor stated in paragraph 11 of this SSA. As with the overall objectives of the auditor, the ability to achieve an individual objective is equally subject to the inherent limitations of an audit.
- A69. In using the objectives, the auditor is required to have regard to the interrelationships among the SSAs. This is because, as indicated in paragraph A53, the SSAs deal in some cases with general responsibilities and in others with the application of those responsibilities to specific topics. For example, this SSA requires the auditor to adopt an attitude of professional skepticism; this is necessary in all aspects of planning and performing an audit but is not repeated as a requirement of each SSA. At a more detailed level, SSA 315 and SSA 330 contain, among other things, objectives and requirements that deal with the auditor’s responsibilities to identify and assess the risks of material misstatement and to design and perform further audit procedures to respond to those assessed risks, respectively; these objectives and requirements apply throughout the audit. A SSA dealing with specific aspects of the audit (for example, SSA 540) may expand on how the objectives and requirements of such SSAs as SSA 315 and SSA 330 are to be applied in relation to the subject of the SSA but does not repeat them. Thus, in achieving the objective stated in SSA 540, the auditor has regard to the objectives and requirements of other relevant SSAs.

#### *Use of Objectives to Determine Need for Additional Audit Procedures (Ref: Para. 21(a))*

- A70. The requirements of the SSAs are designed to enable the auditor to achieve the objectives specified in the SSAs, and thereby the overall objectives of the auditor. The proper application of the requirements of the SSAs by the auditor is therefore expected to provide a sufficient basis for the auditor’s achievement of the objectives. However, because the circumstances of audit engagements vary widely and all such circumstances cannot be anticipated in the

SSAs, the auditor is responsible for determining the audit procedures necessary to fulfill the requirements of the SSAs and to achieve the objectives. In the circumstances of an engagement, there may be particular matters that require the auditor to perform audit procedures in addition to those required by the SSAs to meet the objectives specified in the SSAs.

#### Use of Objectives to Evaluate Whether Sufficient Appropriate Audit Evidence Has Been Obtained (Ref: Para. 21(b))

A71. The auditor is required to use the objectives to evaluate whether sufficient appropriate audit evidence has been obtained in the context of the overall objectives of the auditor. If as a result the auditor concludes that the audit evidence is not sufficient and appropriate, then the auditor may follow one or more of the following approaches to meeting the requirement of paragraph 21(b):

- Evaluate whether further relevant audit evidence has been, or will be, obtained as a result of complying with other SSAs;
- Extend the work performed in applying one or more requirements; or
- Perform other procedures judged by the auditor to be necessary in the circumstances.

Where none of the above is expected to be practical or possible in the circumstances, the auditor will not be able to obtain sufficient appropriate audit evidence and is required by the SSAs to determine the effect on the auditor's report or on the auditor's ability to complete the engagement.

#### Complying with Relevant Requirements

##### Relevant Requirements (Ref: Para. 22)

A72. In some cases, an SSA (and therefore all of its requirements) may not be relevant in the circumstances. For example, if an entity does not have an internal audit function, nothing in SSA 610<sup>26</sup> is relevant.

A73. Within a relevant SSA, there may be conditional requirements. Such a requirement is relevant when the circumstances envisioned in the requirement apply and the condition exists. In general, the conditionality of a requirement will either be explicit or implicit, for example:

- The requirement to modify the auditor's opinion if there is a limitation of scope<sup>27</sup> represents an explicit conditional requirement.
- The requirement to communicate significant deficiencies in internal control identified during the audit to those charged with governance,<sup>28</sup> which depends on the existence of such identified significant deficiencies; and the requirement to obtain sufficient appropriate audit evidence regarding the presentation and disclosure of segment information in accordance with the applicable financial reporting framework,<sup>29</sup> which depends on that framework requiring or permitting such disclosure, represent implicit conditional requirements.

In some cases, a requirement may be expressed as being conditional on applicable law or regulation. For example, the auditor may be required to withdraw from the audit engagement, *where withdrawal is possible under applicable law or regulation*, or the auditor may be required to do something, *unless prohibited by law or regulation*. Depending on the

<sup>26</sup> SSA 610, "Using the Work of Internal Auditors."

<sup>27</sup> SSA 705, "Modifications to the Opinion in the Independent Auditor's Report," paragraph 13.

<sup>28</sup> SSA 265, "Communicating Deficiencies in Internal Control to Those Charged with Governance and Management," paragraph 9.

<sup>29</sup> SSA 501, "Audit Evidence—Specific Considerations for Selected," paragraph 13.

jurisdiction, the legal or regulatory permission or prohibition may be explicit or implicit.

#### Departure from a Requirement (Ref: Para. 23)

- A74. SSA 230 establishes documentation requirements in those exceptional circumstances where the auditor departs from a relevant requirement.<sup>30</sup> The SSAs do not call for compliance with a requirement that is not relevant in the circumstances of the audit.

#### *Failure to Achieve an Objective* (Ref: Para. 24)

- A75. Whether an objective has been achieved is a matter for the auditor's professional judgment. That judgment takes account of the results of audit procedures performed in complying with the requirements of the SSAs, and the auditor's evaluation of whether sufficient appropriate audit evidence has been obtained and whether more needs to be done in the particular circumstances of the audit to achieve the objectives stated in the SSAs. Accordingly, circumstances that may give rise to a failure to achieve an objective include those that:
- Prevent the auditor from complying with the relevant requirements of an SSA.
  - Result in its not being practicable or possible for the auditor to carry out the additional audit procedures or obtain further audit evidence as determined necessary from the use of the objectives in accordance with paragraph 21, for example due to a limitation in the available audit evidence.
- A76. Audit documentation that meets the requirements of SSA 230 and the specific documentation requirements of other relevant SSAs provides evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor. While it is unnecessary for the auditor to document separately (as in a checklist, for example) that individual objectives have been achieved, the documentation of a failure to achieve an objective assists the auditor's evaluation of whether such a failure has prevented the auditor from achieving the overall objectives of the auditor.

---

# CONFORMING AMENDMENTS AS A RESULT OF SSA 200, OVERALL OBJECTIVES OF THE INDEPENDENT AUDITOR AND THE CONDUCT OF AN AUDIT IN ACCORDANCE WITH SINGAPORE STANDARDS ON AUDITING

## Preface to the Singapore Standards on Quality Control, Auditing, Review, Other Assurance and Related Services (Preface)

[There are no changes proposed to paragraphs 1–3. Accordingly, they are not reproduced.]

### The Authority Attaching to Singapore Standards

[There are no changes proposed to paragraphs 4–5 and 7–9. Accordingly, they are not reproduced.]

6. Singapore Standards on Assurance Engagements (SSAEs) are to be applied in assurance engagements ~~dealing with subject matters~~ other than audits or reviews of historical financial information.

### Singapore Standards on Auditing<sup>4</sup>

10. SSAs are written in the context of an audit of financial statements<sup>12</sup> by an independent auditor. They are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. The authority of SSAs is set out in SSA 200.<sup>2</sup>
- ~~11. The objective of an audit of financial statements is to enable the auditor to express an opinion whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. It is undertaken to enhance the degree of confidence of intended users in the financial statements. SSAs, taken together, provide the standards for the auditor's work in fulfilling this objective.~~
- ~~12. In conducting an audit, the overall objective of the auditor is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to report on the financial statements in accordance with the auditor's findings. In all cases when this overall objective has not been or cannot be achieved, the SSAs require that the auditor modifies the auditor's opinion accordingly or withdraws from the engagement.~~
- ~~13. The auditor applies each SSA relevant to the audit. An SSA is relevant when the SSA is in effect and the circumstances addressed by the SSA exist.~~
- ~~14. The SSAs deal with the general responsibilities of the auditor, as well as the auditor's further considerations relevant to the application of those responsibilities to specific topics. An SSA contains objectives and requirements together with related guidance in the form of application and other explanatory material. It may also contain introductory material that provides context essential to a proper understanding of the SSAs, and definitions. It is, therefore, necessary to consider the entire text of an SSA to understand and apply its requirements.~~

<sup>4</sup> The terms and concepts in this Preface are explained further in the SSAs, in particular in SSA 200, "Objective and General Principles Governing an Audit of Financial Statements." (SSA 200 will be revised, inter alia, to incorporate relevant provisions of this Preface that deal with the obligations of the auditor, and the status and authority of objectives, requirements and other material. When SSA 200 is revised and exposed for public comment in 2007, respondents will be invited to comment on the material derived from this Preface in that new context.)

<sup>12</sup> Unless otherwise stated, "financial statements" mean financial statements comprising historical financial information.

<sup>2</sup> SSA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Singapore Standards on Auditing."

<sup>3</sup> Referred to hereafter as "the auditor."

### *SSA Objectives*

15. ~~Each SSA contains an objective or objectives, which provide the context in which the requirements of the SSA are set. The auditor aims to achieve these objectives, having regard to the interrelationships amongst the SSAs. For this purpose, the auditor uses the objectives to judge whether, having complied with the requirements of the SSAs, sufficient appropriate audit evidence has been obtained in the context of the overall objective of the auditor. Where an individual objective has not been or cannot be achieved, the auditor considers whether this prevents the auditor from achieving the auditor's overall objective.~~

### *Requirements*

16. ~~The requirements of each SSA are contained in a separate section and expressed using the word "shall." The auditor applies the requirements in the context of the other material included in the SSA.~~
17. ~~The auditor complies with the requirements of an SSA in all cases where they are relevant in the circumstances of the audit. In exceptional circumstances, however, the auditor may judge it necessary to depart from a relevant requirement by performing alternative audit procedures to achieve the aim of that requirement. The need for the auditor to depart from a relevant requirement is expected to arise only where the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective.~~
18. ~~A requirement is not relevant only in the cases where: the SSA is not relevant; or the circumstances envisioned do not apply because the requirement is conditional and the condition does not exist. The auditor is not required to comply with a requirement that is not relevant in the circumstances of the audit; this does not constitute a departure from the requirement.~~

### *Application and Other Explanatory Material*

19. ~~The application and other explanatory material contained in an SSA is an integral part of the SSA as it provides further explanation of, and guidance for carrying out, the requirements of an SSA, along with background information on the matters addressed in the SSA. It may include examples of procedures, some of which the auditor may judge to be appropriate in the circumstances. Such guidance is, however, not intended to impose a requirement.~~
20. ~~Appendices, which form part of the application and other explanatory material, are an integral part of an SSA. The purpose and intended use of an appendix are explained in the body of the related SSA or within the title and introduction of the appendix itself.~~

### *Introductory Material and Definitions*

21. ~~Introductory material may include, as needed, such matters as explanation of: the purpose and scope of the SSA, including how the SSA relates to other SSAs; the subject matter of the SSA; specific expectations on the auditor and others; and the context in which the SSA is set.~~
22. ~~An SSA may include, in a separate section under the heading 'Definitions', a description of the meanings attributed to certain terms for purposes of the SSAs. These are provided to assist in the consistent application and interpretation of the SSAs, and are not intended to override definitions that may be established for other purposes, whether in law, regulation or otherwise. Unless otherwise indicated, those terms will carry the same meanings throughout the SSAs. The Glossary of Terms in the Handbook contains a complete listing of terms defined in the SSAs. It also includes descriptions of other terms found in SSAs to assist in common and consistent interpretation and translation.~~

## Singapore Standards on Quality Control

<sup>1123</sup>. SSQCs are written to apply to firms in respect of all their services falling under the Singapore Engagement Standards. The authority of SSQCs is set out in the introduction to the SSQCs.

[There are no changes proposed to paragraphs 24–37, except renumbering. Accordingly, they are not reproduced.]

## SSA 230, “Audit Documentation”

### *Nature and Purposes of Audit Documentation*

2. Audit documentation that meets the requirements of this SSA and the specific documentation requirements of other relevant SSAs provides:
  - (a) Evidence of the auditor’s basis for a conclusion about the achievement of the overall objectives of the auditor<sup>1</sup>; and
  - (b) Evidence that the audit was planned and performed in accordance with SSAs and applicable legal and regulatory requirements ...

### *Documentation of Significant Matters and Related Significant Professional Judgments (Ref: Para. 8(c))*

- A11. The auditor may consider it helpful to prepare and retain as part of the audit documentation a summary (sometimes known as a completion memorandum) that describes the significant matters identified during the audit and how they were addressed, or that includes cross-references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor’s consideration of the significant matters. It may also help the auditor to consider whether, in light of the audit procedures performed and conclusions reached, there is any individual relevant SSA objective that the auditor cannot achieve ~~has not met or is unable to meet~~ that would prevent the auditor from achieving the overall objectives of the auditor’s overall objective ...

### *Departure from a Relevant Requirement (Ref: Para. 12)*

- A18. The ~~objectives and requirements of the~~ in SSAs are designed to enable the auditor to achieve the objectives specified in the SSAs, and thereby support the achievement of the overall objectives<sup>6</sup> of the auditor. Accordingly, other than in exceptional circumstances, the SSAs call for compliance with each requirement that is relevant in the circumstances of the audit.
- A19. The documentation requirement applies only to requirements that are relevant in the circumstances.<sup>9</sup> A requirement is not relevant only in the cases where:

---

<sup>1</sup> SSA 200, “Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Singapore Standards on Auditing,” paragraph 11.

<sup>6</sup> [Proposed] SSA 200 (Revised and Redrafted), “Overall Objective of the Independent Auditor, and the Conduct of an Audit in Accordance with Singapore Standards on Auditing,” paragraphs [23-24].

<sup>9</sup> [Proposed] SSA 200, paragraph 22[27].

- (a) The entire SSA is not relevant (for example, if an entity does not have an internal audit function in a continuing engagement, nothing in ~~[proposed]~~ SSA 610540<sup>10</sup> is relevant); or
- (b) ~~The circumstances envisioned do not apply because t~~The requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion where there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability)...

## SSA 240, "The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements"

### *Responsibilities of the Auditor*

5. An auditor conducting an audit in accordance with SSAs is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error. Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may ~~will not~~ be detected,<sup>3</sup> even though the audit is properly planned and performed in accordance with the SSAs.
6. <sup>4</sup>As described in SSA 200, the potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor. Such attempts at concealment may be even more difficult to detect when accompanied by collusion. Collusion may cause the auditor to believe that audit evidence is persuasive when it is, in fact, false. The auditor's ability to detect a fraud depends on factors such as the skillfulness of the perpetrator, the frequency and extent of manipulation, the degree of collusion involved, the relative size of individual amounts manipulated, and the seniority of those individuals involved. While the auditor may be able to identify potential opportunities for fraud to be perpetrated, it is difficult for the auditor to determine whether misstatements in judgment areas such as accounting estimates are caused by fraud or error.
7. Furthermore, the risk of the auditor not detecting a material misstatement resulting from management fraud is greater than for employee fraud, because management is frequently in a position to directly or indirectly manipulate accounting records, present fraudulent financial information or override control procedures designed to prevent similar frauds by other employees.
8. When obtaining reasonable assurance, the auditor is responsible for maintaining ~~an attitude of~~ professional skepticism throughout the audit, considering the potential for management override of controls and recognizing the fact that audit procedures that are effective for detecting error may not be effective in detecting fraud. The requirements in this SSA are designed to assist the auditor in identifying and assessing the risks of material misstatement due to fraud and in designing procedures to detect such misstatement ...

<sup>10</sup> ~~[Proposed]~~ SSA 610540, "Using the Work of Internal Auditors~~Initial Audit Engagements—Opening Balances.~~"

<sup>3</sup> SSA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with Singapore Standards on Auditing," paragraph A51.

<sup>4</sup> SSA 200, paragraph A51.

## Professional Skepticism

12. In accordance with SSA 200,<sup>5</sup> the auditor shall maintain ~~an attitude of~~ professional skepticism throughout the audit, recognizing the possibility that a material misstatement due to fraud could exist, notwithstanding the auditor's past experience of the honesty and integrity of the entity's management and those charged with governance...<sup>4</sup>
- A7. ~~Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence.~~ Maintaining an attitude of professional skepticism requires an ongoing questioning of whether the information and audit evidence obtained suggests that a material misstatement due to fraud may exist. It includes considering the reliability of the information to be used as audit evidence and the controls over its preparation and maintenance where relevant. Due to the characteristics of fraud, the auditor's attitude of professional skepticism is particularly important when considering the risks of material misstatement due to fraud.
- A8. Although the auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance, the auditor's ~~attitude of~~ professional skepticism is particularly important in considering the risks of material misstatement due to fraud because there may have been changes in circumstances...

## SSA 260, "Communication with Those Charged with Governance"

### Definitions

10. For purposes of the SSAs, the following terms have the meanings attributed below:
- (a) Those charged with governance – The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. For some entities in some jurisdictions, those charged with governance may include management personnel, for example, executive members of a governance board of a private or public sector entity, or an owner-manager. ~~In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility).~~<sup>1</sup> For discussion of the diversity of governance structures, see paragraphs A1-A8.
- (b) Management – The person(s) with executive responsibility for the conduct of the entity's operations. For some entities in some jurisdictions, management includes some or all of those charged with governance, for example, executive members of a governance board, or an owner-manager. ~~Management is responsible for the preparation of the financial statements, overseen by those charged with governance, and in some cases management is also responsible for approving the entity's financial statements (in other cases those charged with governance have this responsibility).~~<sup>2</sup>...

### Those Charged with Governance (Ref: Para. 11)

- A1. Governance structures vary by jurisdiction and by entity, reflecting influences such as different cultural and legal backgrounds, and size and ownership characteristics. For example:

<sup>5</sup> SSA 200, paragraph 15.

<sup>4</sup> [Proposed] SSA 200 (Revised and Redrafted), paragraph [18].

<sup>1</sup> As described at paragraph [A43] of [proposed] SSA 700, (Redrafted), "The Independent Auditor's Report on General Purpose Financial Statements," having responsibility for approving in this context means having the authority to conclude that all the statements that comprise the financial statements, including the related notes, have been prepared.

<sup>2</sup> See footnote 1.

- In some jurisdictions a supervisory (wholly or mainly non-executive) board exists that is legally separate from an executive (management) board (a “two-tier board” structure). In other jurisdictions, both the supervisory and executive functions are the legal responsibility of a single, or unitary, board (a “one-tier board” structure).
- In some entities, those charged with governance hold positions that are an integral part of the entity’s legal structure, for example, company directors. In others, for example, some government entities, a body that is not part of the entity is charged with governance.
- In some cases, some or all of those charged with governance are involved in managing the entity. In others, those charged with governance and management comprise different persons.
- In some cases, those charged with governance are responsible for approving the entity’s financial statements (in other cases management has this responsibility). ...<sup>3</sup>

## All Final Clarified SSAs

### *Phrases*

~~“attitude of professional skepticism”~~

- SSA 250, paragraph 8.
- SSA 540, paragraph A40.
- SSA 550, paragraph A9.

~~“affected by the inherent limitations of inherent to internal control”~~

- SSA 315, paragraph A42.

---

<sup>3</sup> As described at paragraph A40 of SSA 700, “Forming an Opinion and Reporting on Financial Statements,” having responsibility for approving in this context means having the authority to conclude that all the statements that comprise the financial statements, including the related notes, have been prepared.
